Let Vaughan's Seed Store Service Protect You

INTO the cost of the florist's products go coal, rent, labor, supplies, all fixed and equally high for good results and bad. And with whatever skill and faithfulness they may be expended in growing inferior bulbs or seeds, the result can only be disappointment.

For fifty years we have supplied the most critical florists with forcing bulbs, of which the quality is assured by our long experience in importing and knowledge of sources; and the price, by our cash buying power, and convenient shipping centers, in the two great importing and distributing points—Chicago and New York.

Our service is an understanding one. We know your problems and how to meet them. The need of quick action on your order has been drilled into our organization in years of training. As to our willingness to stand behind everything we sell, ask one of the customers who have tried us out.

Dutch Bulb Crop Report

M. van Toulon van der Koog, secretary of the Dutch Bulb Exporters' Association, Haarlem, Holland has sent the following report of the Holland bulb crop:

"Originally a very satisfactory crop was expected; however, on account of the heat, which set in suddenly during the last two weeks, the crop will not come up to the expectation entertained.

"The hyacinth bulbs are good, but the crop of the large sizes will be moderate.

"The crop of the Darwin and late tulips is good; that of the single and double early tulips, fairly good, though below the expectation.

"The crop of narcissus bulbs is not so good as last year and, on the whole, moderate; that of the crocus also moderate.

"The weather for the ripening of the bulbs has been favorable, so that we may expect to get bulbs which, though they will be smaller, will have a good forcing capacity."

The Embargo on Bulbs

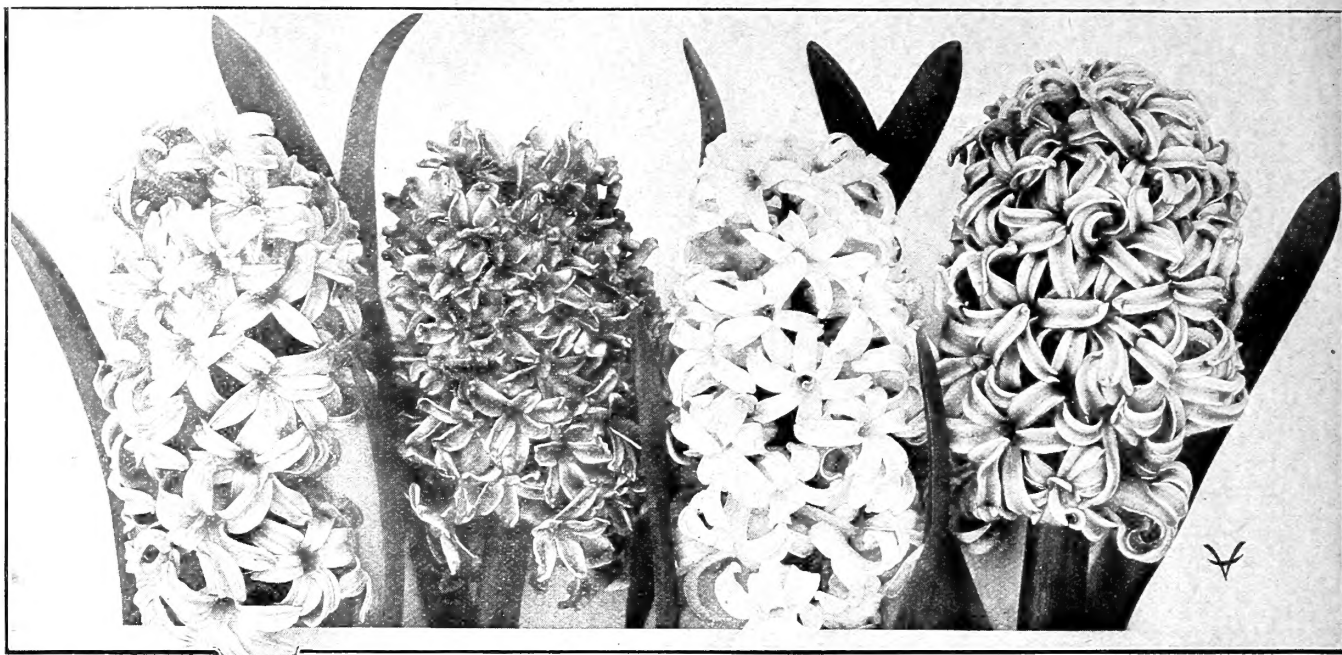

All users of imported bulbs should take notice that after January 1, 1926, by order of the Federal Horticultural Board, the following bulbs, now admitted without restriction, may be imported only on special permit, for propagation, scientific, or similar purposes; but not for resale, or to produce flowers for sale: Narcissi of all classes and varieties, Fritillaria Meleagris, Fritillaria Imperialis (Crown Imperial), Muscari (Grape Hyacinth), Snowdrops (Gallanthus), Scillas, Chionodoxa (Glory of the Snow), Eranthis Hyemalis (Winter Aconite).

The prices in this catalogue are subject to change without notice. Those florists who placed their orders with us before May 1st will be invoiced at early import prices.

GIANT BLOSSOMS OF CLEAR COLORING COME FROM OUR HYACINTH BULBS

Hyacinths Dutch-Grown (Single)

French Roman Hyacinths

French crops are apparently lighter each year and prices higher. It is very useful for all who grow for their own retail cut-flower work for winter bloom. Growers find these useful at holidays.

We can offer the following sizes:	Per 100	Per 1000
White Roman Hyacinths, 11-12 ctms.....	\$10.00	\$ 95.00
White Roman Hyacinths, 12 ctms. & up...	13.50	120.00
Colors.....	8.00	75.00

The prices which we give below on Hyacinths may seem a little high but this is due to crop conditions and heavy demands from other countries.

No florist should defer purchasing this valuable bulb which he can use for pots for his Easter and Mother's Day trade. They cost no more to grow and the price of the pot is the same so with a slight increase over your selling price of last year same will go unnoticed with general public.

Formosum

Cold Storage 10 Days

Growers must not force Formosum in great heat. A cool house, 60 to 65 degrees, with plenty of moisture is better, but they will certainly do best when grown in pots. The so-called Formosum seems to be a class rather than a single type, and starts into growth irregularly, so if in pots they can be shifted into sections representing varying heights to give proper light and watering.

N. B.—Ten days in cold storage before planting is sure to benefit the crop.

Lily of the Valley

In packing and grading the Lily of the Valley Pips for our trade, pips of one type and style of growth, raised on the same soil, will be branded separately, so that the customer receiving a certain number and brand from us, and forcing it to his satisfaction can depend on the same grade right along until sold out and will be advised by us when the grade is changed. This, we believe, will be much more satisfactory to the grower than the former indiscriminate method of delivering all kinds and shapes of Valley under one brand, the planter never knowing what kind of a pip would open up in the next case received.

Narcissus Paper White Grandiflora

PROMPT delivery, honest grading, and high forcing quality are the points which florists are most vitally interested in the case of Paper White Narcissi. Again this year Vaughan's Seed Store's shipments on advance orders were first out of the port of New York, giving our customers earliest delivery of these important forcing bulbs.

Our bulbs are carefully graded in France and packed in full standard cases. We handle no "baby cases." Such bulbs will average at least one dollar per thousand higher in value than the quality sold by peddlers. We urge our customers to compare size, quality and finish as well as prices; and we will meet any reliable competition on such a basis.

We ask that in ordering from this stock you give us the privilege of filling with the next lower size if we cannot furnish the exact size ordered.

ENGLISH SPAWN. A very superior strain to the old English Milltrack Spawn. ANNUALS FOR FALL SOWING

Few know many of our prettiest and best known annuals may be sown in the fall, in fact some varieties, like the annual Larkspur, are much better, treated in this way. The principle is the one nature uses. Seed dropped from parent plants will lay dormant in the soil until early in the spring when it germinates and begins a root system long before one can get in the ground to sow seed. Consequently the flowering season is prolonged by the earlier blooming. Ground should be prepared and seed sown just previous to the late heavy frost—early in November.

Below is a partial list which may be sown successfully in fall:

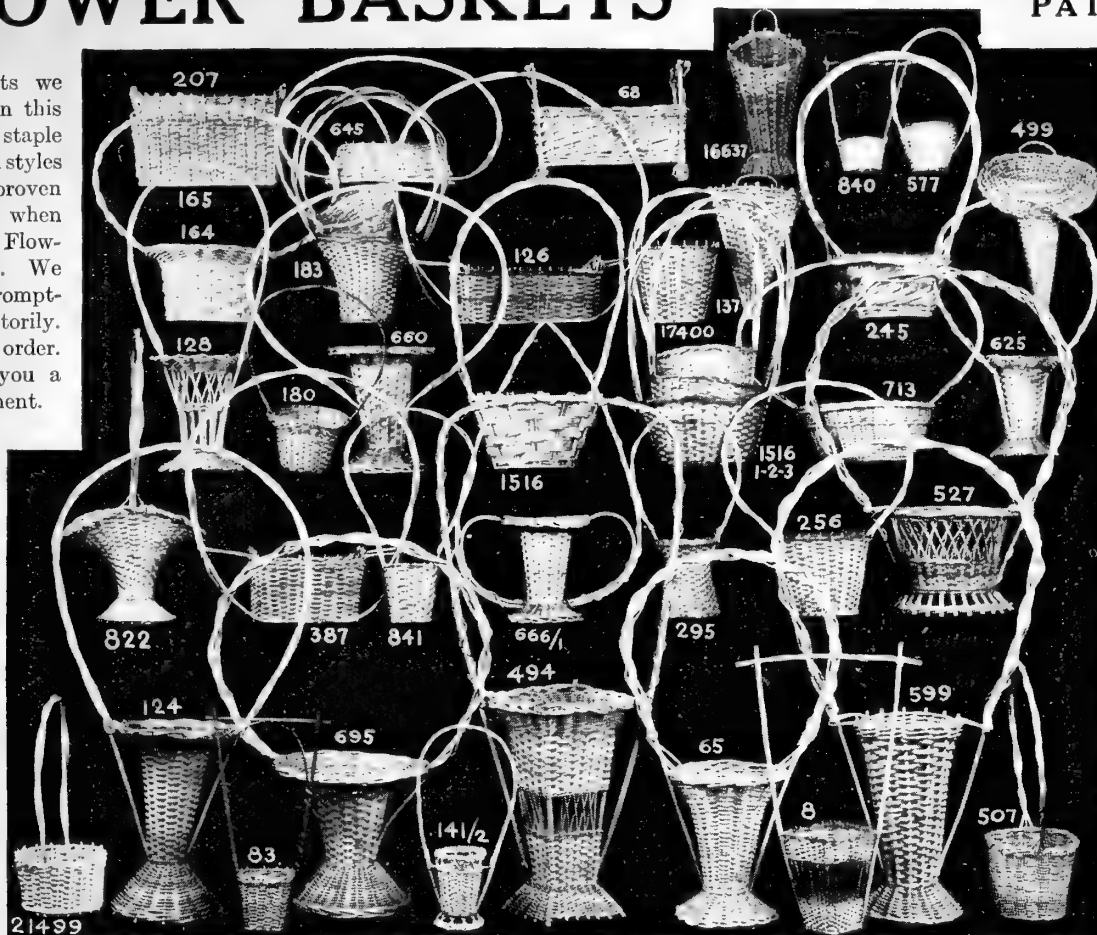

Alyssum	Cosmos	Nemophila
Antirrhinum	Escholtzia	Nigella
Brachycome	Hunnemannia	Poppy
Calendula	Larkspur (Annual)	Sweet Peas
Calliopsis	Lavender Lace	Virginia Stocks
Candytuft	Flower (Didiscus)	Viscaria
Centaurea	Matthiola
